## About

I am Dushyant Sharma having 2 years of experience in Robotics Process Automation. I am automating the business process using Automation Anywhere and Python. I have good exposure to other automation tools like Power Automate and UiPath as well. Also, I have expertise in creating dynamic dashboards, reports & alerts using Tableau, Splunk Enterprise, and Google Analytics.

## Education

- Ujjain Engineering College, Ujjain** 2017-2021  
B.Tech  
7.67
- Balaji Higher Secondary School, Mihona** 2015-2016  
12th  
89.8%
- Balaji Higher Secondary School, Mihona** 2013-2014  
10th  
90.6%

## Experience

- Neutrino Tech Systems** 06-09-2021 - Now  
Associate Software Engineer
  - Implemented multiple use cases using Automation Anywhere 360, MySQL and Splunk.
  - Was part of requirement gathering, LLD and HLD as a team member.
  - Worked directly with clients for project flow, enhancements and regular presentations.
  - Exception handling design and correct use of stages and blocks.
  - Have hands on experience on other automation tools like Power Automate and UiPath as well.
  - Have good knowledge of deploying, scheduling and migration of bots.
  - First person in the organization to learn and implement Splunk dashboard using logs on business demand.
  - Trained 6 other resources on Splunk Enterprise.
  - Migrated Universal Analytics Dashboards to Google Analytics 4.
  - Helped business to achieve desired tracking of traffic, user aquisition and profitability using GA4.

## Skills

- Automation (AA360, UiPath, Power Automate)
- Programming - Python
- Database (MySQL, SQL Server)
- Data Visualization (Splunk, Tableau)
- Excel (Macros, VBA)

## Certificates

- Automation Anywhere 360 Advanced RPA Professional
- UiPath Foundation Course
- MySQL (HackerRank)
- Decisions Developer

## Projects

- **PD Dropship Confirmation Order**

**Project Description :** A RPA solution which helps to automate the process for getting the required data from Suppliers via Email and storing those in Database so to generate the Report out of it in Microsoft Excel.

**Technologies :** Automation Anywhere 360, SQL, Splunk, Jira

**Roles and Responsibilities :**

- Understand the business process requirement and design.
- Design, develop and review the automation solution.
- Created helper bots to automate the process using AA360.
- Troubleshooting, understand and implement client requirements.
- Performed CRUD operations by connecting AA360 with MySQL.

- **Canada Open PO**

**Project Description :** An RPA solution that helps the business to get data in proper format from supplier Or Vendors in Excel via email to maintain consistency of standard created by them among 1000's of suppliers.

**Technologies :** Automation Anywhere 360, SQL, Excel, Splunk, Jira

**Roles and Responsibilities :**

- Design end-to-end automation solution for clients.
- Develop codes to meet the defined design/solution approach using AA360.
- Ensure quality of coded components by performing end to end unit testing.
- Setting up the connection with the MySQL database and Excel.
- Writing queries to insert/update/delete values in DB.

- **GBS Web Automation**

**Project Description :** This project involves the implementation of RPA solution using Automation Anywhere to fetch data of 10 websites, each containing information of various medical products. The fetched data is then stored efficiently in SQL database and then report is sent in excel to the business.

**Technologies :** Automation Anywhere 360, SQL, Excel, Jira

**Roles and Responsibilities :**

- Designed solution using RPA best practices and maintained technical responsibilities.
- Automated tasks using web recorder.
- Ensure helper bots are designed for reusability.
- Created database connections to fetch and insert the data.
- Regular demos are given to clients for the development process.

- **Integrated Billing**

**Project Description :** Login into Transperfect portal, download previous month's data and load it into raw table in database. Execute stored procedure and then enter summarized data into database.

**Technologies :** Automation Anywhere 360, SQL, Excel, Jira, Splunk

**Roles and Responsibilities :**

- Worked on end to end project implementation with best practices.
- Wrote database connection string, Stored procedure and insured needed drivers are installed on machines.
- Migration of metabots to implement Splunk logging.
- Connected Splunk for better understanding of logs and creation of Dashboard.
- Regular Client interaction for better experience of business.

- **First view and Grifols**

**Project Description :** Download the attachments from outlook. Validate data and place it into the universal shared folder.

**Technologies :** Automation Anywhere 360, Excel, Jira, Splunk

**Roles and Responsibilities :**

- Design, develop and review the automation solution.
- Created helper bots to automate the process using AA360.
- Verification of files and send the alert in case of wrong files.
- Identification of folders, renaming the files as per requirements.
- Connect with business for regular demos.

### **Achievements & Awards**

- Got Spot Award in May 2023 for successful migrating Universal Analytics Dashboards to Google Analytics 4.
- Got Spot Award in July 2022 for successful implementation of PD Dropship Confirmation Project.
- Got Award from Madhya Pradesh CM Mr. Shivaraj Singh Chauhan for getting excellent marks in Class 12th.

### **Declaration**

- The above statements are true to the best of my knowledge and belief.
- Name : Dushyant Sharma
- Date: 15-07-2023
